Profiles and accessories for installation

PP LEVEL PLUS

Description

PP Level Plus is a line of supports for laying on any type of surface, raised floors in tiles with a 4 mm grout thickness.
These supports allow the underlying inspection of the plants without any demolition.
The perfect final leveling of the flooring is possible thanks to the millimeter adjustment by turning the ring integrated in the supports.
The adjustment of the ring can be done by hand or with the adjustment key art. CR available among the accessories.
The self-leveling head allows the supports to adapt to the support surface up to a 5% slope making the flooring surface perfectly horizontal.
The head is complete with a 2 mm thick anti-shock rubber disk, its use allows to reduce the noise caused by trampling by preventing the contact between the tiles and the supports.
Each support has a capacity of 400 kg at any adjustment height.
PP Level Plus are the ideal solution for terraces, swimming pools, pedestrian crossings on roofs and hanging gardens.
They adapt perfectly to the assembly with the Protec CPLV profiles for the protection and finishing of the external edges of raised floors.
Special steel clips are also available (article CC / 01, CC / 02, CC / 03) for the installation of vertical curtain walls in the perimeters of the external edges or for a joint along the wall support.

Materials

PP
Recycled polypropylene reinforced talc 20%, colour black, resistant to both acid and basic solutions and atmospheric agents.
Classification of reaction to fire E.
Operating temperature -40 ° C + 75 ° C.
The mechanical characteristics remain unchanged overtime.

TPE
Antishock pads in green thermoplastic rubber, resistant to abrasion and impact.

Laying

The product is laid dry, without adhesives or other fixings.

Care and maintenance

PP and TPE
They do not require special maintenance.
